R2 | Cohorts

Historical snapshot | 1 December 2009 to 9 December 2011 | GBP

Value Overview | Segment Migration | Cohorts | Review Actions | Parameters | Checks

Assigned country: ALL | 90-day complete individual follow-up | frozen full window

Complete-follow-up customers

5,256

Qualifying repeat customers

2,445

Repeat / complete follow-up

46.52%

First observed purchase is not verified acquisition. Partial months use only complete individuals; unavailable follow-up stays blank. End-of-window RFM is never treated as a prediction of earlier repeat outcomes.

First observed	Observed	Complete	Incomplete	Repeat	Repeat rate	Follow-up state
Dec 2009	951	951	0	579	60.88%	complete_cohort
Jan 2010	368	368	0	197	53.53%	complete_cohort
Feb 2010	375	375	0	193	51.47%	complete_cohort
Mar 2010	441	441	0	193	43.76%	complete_cohort
Apr 2010	294	294	0	116	39.46%	complete_cohort
May 2010	255	255	0	94	36.86%	complete_cohort
Jun 2010	267	267	0	103	38.58%	complete_cohort
Jul 2010	185	185	0	82	44.32%	complete_cohort
Aug 2010	163	163	0	86	52.76%	complete_cohort
Sep 2010	239	239	0	108	45.19%	complete_cohort

Oct 2011	221	0	221	0		unobservable
Nov 2011	191	0	191	0		unobservable
Dec 2011	28	0	28	0		unobservable

Source-start cohort sensitivity

43.34%

Excluding the first observed month is a diagnostic for cohort composition, instead of a correction for all left censoring. Cohort review minima apply to the complete denominator.

Future and partial-month activity

The imported PQ_Activity table preserves unavailable final-month values as blanks. Future month combinations remain absent. It is an activity measure, instead of the 90-day repeat metric shown here.
